INVESTMENT PROPOSAL AND COSTING

The MAXHOSA AFRICA app

A culture-led app for shopping, events and storytelling: designed, built and launched on iPhone and Android, and owned by MAXHOSA AFRICA.

R489 000

Total investment, fixed price,
excluding VAT. Launch in 14 weeks.

WORKING CONCEPT · SAMPLE DATA

ISSUED	VALID UNTIL	REFERENCE
12 October 2026	11 November 2026	LL-PRP-2026-002

PREPARED FOR

The Management Team, MAXHOSA AFRICA
For the attention of Business Enquiries
business@maxhosa.africa

PREPARED BY

Magugu S. Nzimande, Founder & CEO
LegacyLeverage Creative Agency (Pty) Ltd
Reg. 2025/556899/07

Issued under the signature of the Founder & CEO, as every LegacyLeverage offer is. Figures are in South African rand. Screens shown are from the working concept app and use sample data.

EXECUTIVE SUMMARY

One investment. An owned channel that sells, tells the story and fills every event.

MAXHOSA AFRICA has a following most brands would pay to reach. Today that relationship lives on platforms MAXHOSA does not control. The app brings it home: a direct line to customers in South Africa and abroad, where every collection, story and event can turn attention into orders.

INVESTMENT **R489 000** Fixed price, excluding VAT	TIME TO MARKET **14 weeks** From signature to both app stores	PAYS BACK AFTER **≈ 223 orders** At a R4 000 order and 55% margin (illustrative, p. 8)
YOU OWN **App, code, data** Transferred to MAXHOSA AFRICA on final payment	RUNNING COSTS **R3 000–R8 000** A month at launch volumes, billed at cost	RISK CONTROL **Week-2 gate** Re-scope before build if the store platform differs

WHAT YOU GET

A premium iPhone and Android app

Shop, sign in, track orders, save pieces, get restock alerts, book a stylist, and RSVP to events, all in MAXHOSA's own design language.

WHY IT PAYS

Reach you own, not rent

Every message to an opted-in customer goes straight to their phone. No bidding for attention, no algorithm deciding who sees a new collection.

WHY NOW

The work is already proven

A working concept of the app, with events, a menu and an offline demo, already exists and is tested. The build starts from it, not from a blank page.

THE DECISION

Approve discovery and build

Sign the acceptance on page 12. Discovery starts within five working days, and nothing beyond it is spent until the week-2 gate confirms the plan.

THE INVESTMENT CASE

Why an app, and why it creates value beyond the sale

An investor asks one question: what asset does this money create, and how does it earn? The MAXHOSA AFRICA app is a marketing channel, a store and a community tool in one, and it compounds: every customer it gains can be reached again.

01

Own the relationship

Social reach is rented and rationed. App customers who opt in can be reached directly with new drops, restocks and invitations, at almost no cost per message.

02

Culture is the moat

MAXHOSA's value is meaning as much as knitwear. The app is where approved collection stories sit beside the product, told the brand's way and never invented.

03

Events become a growth engine

RSVP, add to calendar, invite a friend, wear the event edit, shop the looks afterwards. Each event markets the next one, and each guest can bring a new customer.

04

First-party data, with consent

Who RSVPs, what people save and which sizes they want back in stock: knowledge MAXHOSA owns, gathered under POPIA with a clear yes for marketing.

05

Built for home and the diaspora

Prices in rand, pounds and dollars, and event times shown in each visitor's own time zone, so customers in London or New York feel as served as those in Johannesburg.

06

Craft that matches the product

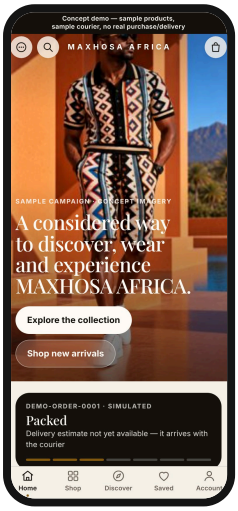

Fluid, Apple-grade interactions, accessible to everyone. A premium product deserves an experience that feels premium from the first tap.

> **The self-marketing loop**
>
> Event announced → customers RSVP → the date goes in their calendar → they invite a friend → both shop the event edit → after the night, everyone can shop the looks → the next event reaches a bigger audience. The app runs this loop without new media spend each time.

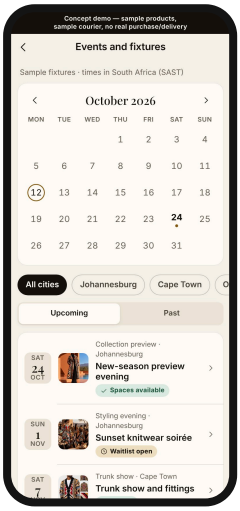

PROOF BEFORE PAYMENT

The app already works. This investment takes it to market.

LegacyLeverage has built a working concept of the MAXHOSA AFRICA app from the brand's own brief: real screens, real interactions, sample data. It is the foundation of the build, folded into the price.

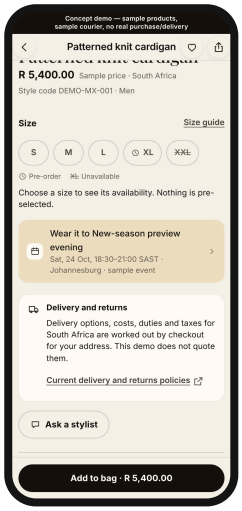

HOME

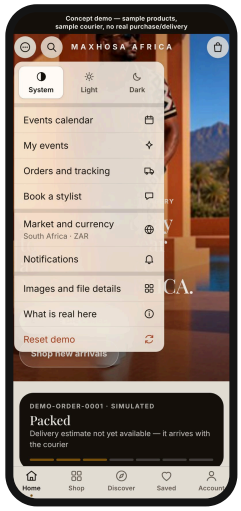

EVENTS CALENDAR

EVENT PAGE

PRODUCT: WEAR IT TO…

MENU

ALREADY BUILT

The app, on iPhone, Android and web

Home, shop with filters, product pages with size guide, saved items, bag, checkout handoff, orders and delivery tracking, stylist enquiries, account and notifications.

ALREADY BUILT

Events and fixtures

A month calendar, RSVP with waitlist and invitations, add to calendar, invite a friend, and "wear it to" links from product pages.

ALREADY TESTED

Checked automatically, every change

78 automated app tests, 21 screen checks and 132 offline-demo checks, including accessibility and contrast, so quality is measured, not assumed.

ALREADY SHAREABLE

An offline demo anyone can open

One file, sent by WhatsApp or email, that runs the whole concept on any phone or laptop without internet: ideal for board and investor reviews.

At market agency rates, this concept work is worth about R1 million (LegacyLeverage cost audit, October 2026). It is included at no extra charge.

WHAT R489 000 BUYS

The Launch Edition: everything needed to sell, engage and grow from day one

Included

- **Discovery and platform confirmation**, with a go / re-scope decision at week 2.
- **MAXHOSA's brand system** (approved logo, typefaces, palette) on every screen, plus app icon and store artwork.
- **Shop**: live catalogue, search and filters, product pages with size guide and stock, saved items, bag, and secure checkout on MAXHOSA's existing store.
- **Accounts and orders**: sign-in with the store's customer accounts, order history, carrier tracking links and a status timeline.
- **Events and fixtures**: calendar, event pages, RSVP with waitlist and invitations, add to calendar, invite a friend, the shoppable event edit.
- **Notifications with consent**: collection drops, restock alerts, event reminders.
- **Styling appointment enquiries**, routed to client care.
- **Release on the App Store and Google Play** under MAXHOSA's developer accounts.
- **Launch marketing kit**: store screenshots and copy, launch email and social assets, and a KPI dashboard.
- **30 days of hypercare**, training, and full handover of code and accounts.

Not included, quoted when needed

- A custom checkout or in-app payments (checkout stays on MAXHOSA's store, which keeps payments secure and simple).
- Live courier map tracking.
- Integration with a booking system.
- Store locator and secure message centre.
- CRM integration beyond consented email capture.
- Languages beyond English.
- Photography, video and copywriting.
- Third-party fees: store platform, payments, couriers, developer accounts, hosting.
- Support after the 30-day hypercare period (an optional care plan is available).

The one assumption that matters

MAXHOSA's online store runs on a platform with standard storefront and customer-account APIs (for example Shopify). We confirm this by week 2. If it does not, we re-scope with you before any further cost is incurred.

THE COSTING

R489 000, itemised

	DELIVERABLE	EFFORT (DAYS)	PRICE
01	**Discovery and platform confirmation** Workshops, store and API audit, launch backlog, success measures. Ends in a go / re-scope decision.	7	R39 500
02	**Brand system and launch design** MAXHOSA's approved logo, typefaces and palette applied to every screen; app icon, splash and store artwork.	10.5	R58 900
03	**Shop, accounts and orders** Live catalogue, search and filters, product pages with size guide and stock, saved items, bag and secure checkout on MAXHOSA's store; sign-in, order history and tracking links.	30.5	R168 400
04	**Events and fixtures** Calendar, event pages, RSVP with waitlist and invitations, add to calendar, invite a friend, the shoppable event edit.	11.5	R62 300
05	**Notifications with consent** Collection drops, restock alerts and event reminders; marketing only with a customer's yes.	6.5	R34 800
06	**Quality, accessibility and devices** Testing on current iPhones and Android phones, screen readers, large text, performance.	7.5	R41 600
07	**App Store and Google Play release** Builds, listings, privacy declarations and review, under MAXHOSA's developer accounts.	4.5	R24 900
08	**Launch marketing kit** Store screenshots and copy, launch email and social assets, a KPI dashboard from day one.	5.5	R29 700
09	**Hypercare and handover** 30 days of priority fixes after launch, training, and full handover of code and accounts.	5	R28 400
	Subtotal	**88.5**	**R488 500**
	Rounding		R500
	Total investment, fixed price, excluding VAT		**R489 000**
	VAT at 15%, if applicable		R73 350

Effort is in person-days for a senior team, about 708 hours in all, which works out to R690 an hour. Market agency rates in our cost audit run from R800 to R1 100 an hour.

VALUE FOR MONEY

A native app to market for a fraction of a full programme

MAXHOSA's own app brief puts a full premium iOS and Android programme at R7 million to R14 million. The Launch Edition delivers the first release, the part that starts earning, for R489 000.

Ranges are the planning estimates in the MAXHOSA AFRICA App brief (v1.2), ex VAT. The full programme adds booking, CRM, store locator, message centre and live delivery features with a larger team. Those can follow the launch, funded by what the app earns and guided by real usage.

WHY THE PRICE IS LOWER · 1

The concept is already built

About R1 million of design, screens and tests carry straight into the build.

WHY THE PRICE IS LOWER · 2

No second store to build

The app uses MAXHOSA's existing store for products, stock, checkout and orders, so there is one source of truth and nothing to duplicate.

WHY THE PRICE IS LOWER · 3

One codebase, three platforms

iPhone, Android and web come from the same code, so features are built once.

WHY THE PRICE IS LOWER · 4

A lean senior team, phase-gated

Automated testing and a clear scope keep effort focused, and later phases are only bought when the data says so.

Three-year cost of ownership

R489 000 to build, plus running costs of R3 000–R8 000 a month at launch volumes, comes to **R597 000–R777 000 over three years**, before any optional care plan or new phases.

RETURN ON INVESTMENT

The app pays for itself after a few hundred orders

Break-even is simple arithmetic: the investment divided by the gross profit of an average app order. The table shows how many orders it takes across a range of order values and margins.

Orders needed to recover R489 000

AVERAGE ORDER	45% GROSS MARGIN	55% GROSS MARGIN	65% GROSS MARGIN
R2 500	435 orders	356 orders	301 orders
R4 000	272 orders	**223 orders**	189 orders
R6 000	182 orders	149 orders	126 orders

Orders needed = R489 000 ÷ (average order × gross margin), rounded up. The values are illustrative, not MAXHOSA's figures; we replace them with actual numbers in discovery. Count only orders that would not have happened without the app.

> **In the middle case: about 19 app orders a month**
>
> At a R4 000 average order and a 55% margin, 223 orders recover the full investment: about 19 a month across the first year. For a brand with MAXHOSA's following, that is a modest bar.

VALUE BEYOND ORDERS

Lower cost to reach customers

Drops and invitations go to customers' phones directly, cutting reliance on paid media for repeat customers.

VALUE BEYOND ORDERS

Fuller events, more new customers

RSVPs, reminders and shared invites make every event a source of new customers.

VALUE BEYOND ORDERS

Smarter buying

Saves, size-specific restock requests and RSVPs show demand before stock is committed.

VALUE BEYOND ORDERS

Brand equity

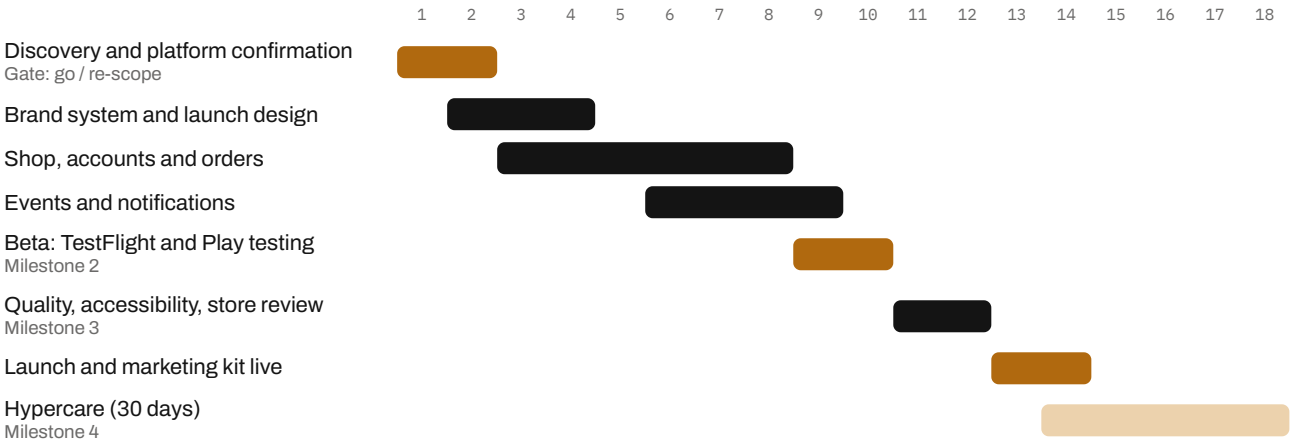

A premium, accessible app makes the brand's story and craft tangible in every customer's hand.

Measured monthly, from day one

Downloads · active customers · notification opt-in · app share of online orders · app conversion · average order value · repeat purchase rate · RSVPs and event attendance · invites sent and new customers from invites · restock requests converted. Targets are agreed with you in discovery.

TIMELINE AND PAYMENTS

Fourteen weeks to launch, with a gate before the build

Weeks from signature. Amber bars mark the points where you see and approve progress.

Paid in four milestones, each tied to something you can see

MILESTONE	WHEN	SHARE	AMOUNT
On signature	Discovery starts	30%	R146 700
Beta on TestFlight and Play testing	Week 10	30%	R146 700
Approved on both stores	Week 12–13	30%	R146 700
After 30 days of hypercare	Week 18	10%	R48 900
Total		**100%**	**R489 000**

Nothing is paid for work you have not seen

After the first payment, each payment follows something you can use: a beta on your own phone, an app approved on both stores, and a month of live operation.

PROTECTION AND GROWTH

How the investment is protected, and where it can grow

RISK	HOW WE MANAGE IT
The store platform differs from our assumption	Week-2 gate: we confirm the platform before build spend and re-scope with you if needed.
Scope grows during the build	Fixed price for the listed scope. Anything new goes through a written change request with its own price, approved before work starts.
App store review delays	Store rules are built in from the start. Two weeks are planned for review, and submissions go through MAXHOSA's own accounts.
Content or approvals arrive late	A shared content calendar, and a five-working-day turnaround on approvals agreed at kickoff.
Low adoption after launch	The launch kit, events and a downloadable offline demo for partners drive installs; the KPI dashboard shows what is working.
Cultural or privacy missteps	Collection stories and cultural meaning come only from MAXHOSA-approved copy. Marketing needs a clear yes, under POPIA.

After launch: grow in phases, funded by what the app earns

OPTIONAL · PHASE 2

Clienteling

Booking-system integration, a store locator, a secure message centre and CRM integration.

OPTIONAL · PHASE 2

Delivery

A live courier map, once a contracted courier supplies real location data.

OPTIONAL · PHASE 3

Global

More languages, market-specific checkout, personalisation and curated outfits.

OPTIONAL · ONGOING

Care plan

Updates for new iOS and Android versions, monitoring, small improvements and support.

Each option is quoted separately after the launch analytics review, so MAXHOSA invests where the data shows a return.

ASSUMPTIONS AND TERMS

What this price rests on

Assumptions

- MAXHOSA's store runs on a platform with standard storefront and customer-account APIs, confirmed by week 2.
- MAXHOSA supplies its approved logo, typefaces, product data, collection copy and event details, and approves deliverables within five working days.
- Apple Developer and Google Play accounts are opened in MAXHOSA AFRICA's name. Developer, hosting and messaging fees are paid at cost: about R3 000–R8 000 a month at launch volumes.
- Imagery: the 24 verified concept images, plus one client-supplied event photograph pending brand approval, until approved full-resolution photography is supplied.
- English at launch. Prices, sizes and stock always come from MAXHOSA's store, never stored separately in the app.

Terms

- Fixed price of R489 000 excluding VAT for the scope on page 5. VAT is added at 15% if applicable.
- On final payment, MAXHOSA AFRICA owns the app's source code, designs and data. LegacyLeverage may show the work in its portfolio once it is public.
- This proposal is valid until 11 November 2026. Changes to scope are agreed in writing before work begins.
- Every offer, quotation and contract of LegacyLeverage is issued only under the signature of its Founder & CEO.

ACCEPTANCE

Ready when you are

Sign below to approve the Launch Edition at R489 000 excluding VAT. Discovery starts within five working days of signature and the first milestone payment.

INVESTMENT	LAUNCH	FIRST PAYMENT
R489 000	**Week 13–14**	**R146 700**
Fixed price, ex VAT	App Store and Google Play	30% on signature
